ANDRI REIMONDO TAMBA, S. KOM

Quality Assurance | IT Enthusiast

andriraymondo@gmail.com | +62 851 7445 2288

Surabaya, East Java, Indonesia

ABOUT ME

I am a graduate in Information Systems from Del Institute of Technology with a strong grasp of concepts and practical skills in software development and quality assurance. Over the past 2 years, I have delved into Quality Control in the technology industry, expanding my insights into quality standards and effective software development processes.

Currently, I am seeking opportunities to join as a software quality assurance engineer, where I can apply my knowledge and experience optimally. Additionally, I am also interested in exploring roles as a system analyst and IT Support, as I believe that my technical skills and understanding would be valuable assets in these roles

---

EXPERIENCES

Software Quality Control at PT AZlogistik Dot Com (muatmuat)   **2022 – Present**

- **Preparation and arrangement of Testing documents :**
  Develop Test Plans, design Test Cases, and develop Test Scenarios for features to be tested on software feature coverage and efficient execution of test activities.
- **Testing with Manual Testing and Automation Testing with Katalon Studio :**
  Perform testing using a combination of manual and automated approaches. Employ Katalon Studio for web application testing and Appium for mobile app testing to enhance efficiency in regression testing.
- **Worked closely with developer team to build systems :**
  Collaborated closely with the development team to build high-quality systems by providing comprehensive testing expertise. This included creating detailed test documentation and executing thorough test plans to identify and resolve defects early in the development lifecycle.

Engineer Internship at Pak Tani Digital (PT Hagatekno Mediata Indonesia)   **2021 (3 months)**

- Designing and building an online shopping system. The purpose of building this system is to assist farmers in agricultural education and addressing agricultural issues. This system also features functionalities for farmers to sell their harvest, purchase agricultural necessities, and more.
